

Vector Software Announces New Office in Phoenix

North Kingstown, RI – October 3, 2005 – Vector Software, a leading provider of software test tools for embedded systems, has established an additional office in Phoenix, AZ. This strategic location has enabled Vector Software to provide direct sales and customer service to the growing Western Region.

“As part of our on-going expansion, Vector Software is pleased to have Steve Siderewicz, the Western Sales Manager, be in close proximity to our extensive west region client base,” said Bill McCaffrey, Marketing Director, Vector Software.

Vector Software currently has other U.S. offices in Rhode Island and North Carolina. Vector is also represented worldwide by a reliable group of distributors and resellers.

About Vector Software

Vector Software, Inc. is a leading independent provider of automated test tools for software Developers. Established in 1989 as a consulting and service organization, Vector's product focus is to empower software professionals to deliver the highest quality software in the least amount of time. Vector's "VectorCAST" line of products, reduce the burden placed on individual developers, by automating and standardizing application component level testing. This innovative technology developed by Vector represents the "next generation" of intelligent embedded software test tools. The tools support the C/C++ and Ada83/95 languages.

The market focus of Vector is on companies performing embedded systems development for aerospace, military, medical, telecom, automotive and process control related projects.

Vector Software's Product Family
