

For Immediate Release

Vector Software to host a Safety Critical Embedded Software Testing Symposium on May 14, 2009

East Greenwich, RI – March 26, 2009. Vector Software, the leading provider of software test tools for embedded systems, today announced that it will host the Safety Critical Embedded Software Testing Symposium on Thursday, May 14, 2009 from 8:30 a.m. to 12:00 p.m. EST. The Symposium will focus on best practices to reduce time, effort and cost in validating your embedded software.

The event will take place at the Forefront Center in Waltham, MA. Further information can be found on the Vector Software web site at <http://www.vectorcast.com/news/newsletters/symposium.html>

The Safety Critical Embedded Software Testing Symposium is a must attend event for those looking for answers to their software testing challenges.

Topics to be discussed include:

- Best practices to meet FAA, FDA and other regulatory agency requirements
- How to optimize your code to ensure testing success
- How some of our customers accomplish their testing objectives
- Via a comprehensive live demonstration on an embedded target, how VectorCAST, the industry-leading embedded software testing tool, addresses unit testing, integration testing, code coverage analysis, system testing, and regression testing

About Vector Software

Vector Software, Inc. is the leading independent provider of automated software testing tools for developers of safety-critical embedded applications. Vector Software's VectorCAST line of products, automate and manage the complex tasks associated with unit, integration, and system level testing. The VectorCAST tools support the C, C++, and Ada programming languages.

Vector Software's Product Family:

VectorCAST/C++
VectorCAST/Ada
VectorCAST/RSP
VectorCAST/Cover
VectorCAST/Manage
VectorCAST/Requirements Gateway
Modified Condition / Decision Coverage (MC/DC) module
DO-178B Qualification Packages
