

Vector Software announces Test Services Facility in Charlotte

North Kingstown, RI – July 19, 2006. Vector Software, a leading provider of software test tools for embedded systems, today announced the opening of an additional office in Charlotte, NC. This office will be used primarily to provide software services to Vector clients.

The Vector Software North Carolina office will provide a variety of technical services to Vector Software customers, including:

- Unit and integration test services
- Technical consulting
- Technical training
- DO-178B certification support

Ben Schomp (bts@vectorcast.com) is the technical manager of this office and can be contacted directly for information. Ben has a strong background as an embedded application engineer and his experience with the product line makes him uniquely qualified to lead this facility.

“The opening of the Charlotte office reflects the ongoing commitment to better serve our customers world-wide, and allows us to further pursue opportunities for growth,” said Bill McCaffrey, Marketing Director at Vector Software. “Over the years we have had many requests from our customers to provide a variety of engineering services, including turn-key testing. Our industry leading test technology, in-house test experience, and reliable partners with significant experience in using or supporting our products, allows us to provide a low-risk solution for both small and large scale test efforts.”

About Vector Software

Vector Software, Inc. is a leading independent provider of automated test tools for software Developers. Established in 1989 as a consulting and service organization, Vector's product focus is to empower software professionals to deliver the highest quality software in the least amount of time. Vector's "VectorCAST" line of products, reduce the burden placed on individual developers, by automating and standardizing application component level testing. This innovative technology developed by Vector represents the "next generation" of intelligent embedded software test tools. The tools support the C/C++ and Ada83/95 languages.

The market focus of Vector is on companies performing embedded systems development for aerospace, military, medical, telecom, automotive and process control related projects.

Vector Software's Product Family

VectorCAST/Ada - for unit/integration testing
VectorCAST/C++ - for unit/integration testing
VectorCAST/RSP - for embedded target testing
VectorCAST/Cover - for system testing code coverage

MC/DC Coverage for DO-178B Level A certification
DO-178B Qualification Packages
