

**Vector Software Announces New Office in London, United Kingdom**

**North Kingstown, RI – June 21, 2007 – Vector Software**, a leading provider of software test tools automation tools, has established a new office in London, United Kingdom. This strategic location has enabled Vector Software to provide direct technical sales and customer support to the growing European Region.

“As part of our on-going commitment to provide tools to the market that reduce time, effort and cost to validate software, Vector Software is pleased to have Niroshan Rajadurai, the European Business Development Manager, be in close proximity to our extensive and rapidly growing European client base,” said Bill McCaffrey, Directory of Marketing for Vector Software.

Vector Software through strategic offices, and resellers can directly service growing global market for products developed under safety critical standards such as DO-178B, IEC-61508, and FDA MED. Vector Software’s automated Unit and System Test tools, permit organizations developing these products to reduce their time to certification, and as a result, significantly reduce their time to market.

**About Vector Software**

Vector Software, Inc. is a leading independent provider of automated test tools for software developers. Established in 1989 as a consulting and service organization, Vector’s product focus is to empower software professionals to deliver the highest quality software in the least amount of time. Vector’s “VectorCAST” line of products, reduce the burden placed on individual developers by automating and standardizing application component level testing. This innovative technology developed by Vector represents the “next generation” of intelligent embedded software test tools. The tools support complete C/C++ and Ada83/95.

The market focus of Vector is on companies performing embedded systems development for aerospace, military, medical, telecom, and process control related projects.
